Summary

Hello! My name is **Daniel Jay** from the Philippines. I am a full stack web developer with over 5+ years of experience in web & mobile development.

I'm currently looking to work with US clients on Upwork to increase my income. So I am going to use a **US Upwork account** on this platform to get enough income. I had everything set up, but I desperately need a US Upwork account to work on Upwork. US clients love working with US freelancers the most. If you cooperate with me, you'll receive regular supplemental income through this contract, in addition to main income from your main job.

Senior Full Stack Developer | React.js, Next.js, Node.js, AWS, TypeScript

\$15.00/hr

 Full Stack Developer | React.js, Next.js, Node.js, AWS, TypeScript 

I'm a results-driven Full Stack Developer with over 5 years of experience building high-performance, scalable web applications across SaaS, EdTech, eCommerce, and enterprise platforms. I specialize in developing clean, maintainable, and production-ready solutions using modern JavaScript frameworks and cloud technologies.

 Core Tech Stack:

Frontend: React.js, Next.js, Vue.js, Angular, Tailwind CSS, TypeScript
Backend: Node.js, Express.js, Nest.js, Django, Spring Boot
Databases: PostgreSQL, MySQL, MongoDB, Firebase
Cloud & DevOps: AWS, Docker, Kubernetes, CI/CD Pipelines, Jenkins
Other: GraphQL, REST APIs, GitHub Actions, Agile Development

 What I Deliver:

-  Scalable, maintainable full-stack web applications
-  Optimized Next.js solutions with SEO and lightning-fast performance
-  Secure and efficient API architecture and integrations
-  Cloud deployment and infrastructure automation with AWS & Docker
-  Reliable, collaborative development with Agile practices

I've worked with startups and global teams to deliver solutions that directly impact users — from building full dashboards and APIs from scratch to optimizing complex systems for speed and reliability.

Let's collaborate to bring your ideas to life and build something amazing together! 

Work history

My Upwork profile

Upwork is one of the most well-known freelancing platforms. <https://www.upwork.com/>

💰 What would you get from the business?

It takes a little time to build a solid reputation on Upwork and start landing long-term projects, here's the payment plan I have in mind:

- Since your account doesn't have any reviews and needs to grow, I'll pay you **\$200** per month for the first 3 months.
- After that, I'll pay you **10%** of my earnings. In 3 months, I will be earning \$5,000, so you will get **\$500** in 4th month. Sooner or later, I will be earning up to \$10,000 on Upwork. Then, your earnings will be **\$1,000**.

🎯 How it works

- Creating / Editing & Verifying Upwork account

If you have never created an account on Upwork, you are free to create a new account now. But you need to add my overview and skill sets on profile.

If you have already created it, not to worry, we can edit the profile together.

After you create it, Upwork requires ID, visual and phone verification. So it's good to prepare it in advance.

- Setting up a Remote computer

Upwork detects the location when I login the account (They also detect any kinds of VPN) so I need to use a real computer placed at your home remotely through **Anydesk** or **Teamviewer**. Ideally this will be done on an unused empty computer or laptop you might have lying around, but if you don't have it, we can discuss more details about this.

And then I will work with your Upwork account to get the jobs on Upwork platform and we can get the money thru Upwork platform once we get the jobs.

Please note that it will be an on-going collaboration that offers you an opportunity to earn passive income while **continuing your main work**.

Thanks for reviewing my business proposal and I am sure it is a good opportunity for you to make extra money on a long term basis.

***Note: If this opportunity sounds like a scam for you, don't reach me out.**

It will be a waste of time for both of us. Thanks!
