Best And Worst Features

	Feature 1	Feature 2	Feature 3	Feature 4
Best	<ul style="list-style-type: none">• Full head of hair	<ul style="list-style-type: none">• Decent jaw shape	<ul style="list-style-type: none">• Healthy skin	<ul style="list-style-type: none">• Full lips
Worst	<ul style="list-style-type: none">• NCT	<ul style="list-style-type: none">• Weak chin	<ul style="list-style-type: none">• Recessed jaw	<ul style="list-style-type: none">• Big nose

Softmaxxing

Lean out

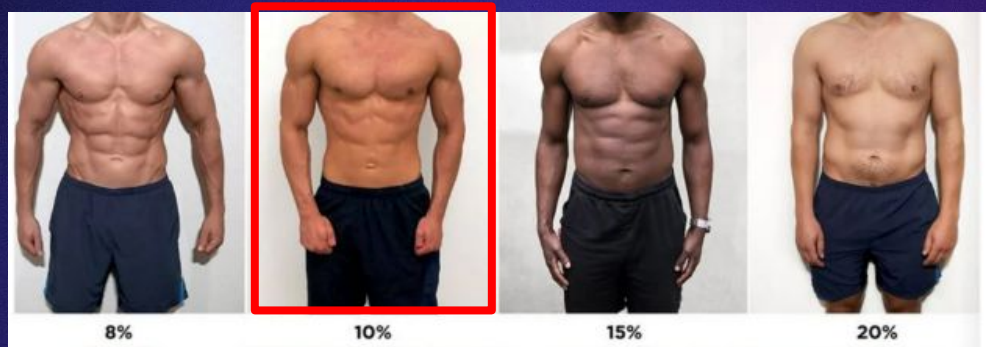

What specifically?

- Aim for a body fat percentage of between 10-12%
- Correct your diet, eat only beef, butter, and eggs.

What will this do?

- Improve your angularity
- Improve dimorphism

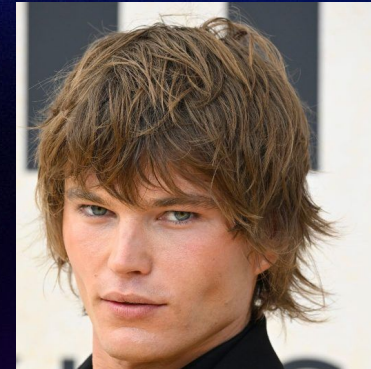

Hairstyling

What specifically?

- Changing hairstyle, experimenting with lengths and finding out how to disguise your flaws and highlight your best features

What will this do?

- Improve feature score
- Allow you to manipulate ratios (making your face appear narrower or shorter)
- Enhance soft features and allow you to establish a niche appeal of your choosing

-Jordan Barrett is an example of how can be used to cover the sides of your face which disguise his facial width improving the appearance of his tfwhr, fwhr, esr and bizygomatic width

Eyebrow Grooming and Dye

Examples

What specifically?

- Apply minoxidil twice every day
- Dormagen twice a week to stimulate growth
- Dye eyebrows black

What will this do?

- Increase your eyebrow density, darkness, and thickness
- Improves dimorphism and features

Skincare

What specifically?

- Over the counter retinol creams
- Staying away from alcohol and excessive seed oil consumption
- Isotretinoin (accutane) in severe cases, only to be done if both first are insufficient
- Organic beef tallow as a moisturizer (optional)

What will this do?

- Produce a strong, glowing complexion
- Increase miscellaneous features score

Makeup

Examples

What specifically?

- Refers to a range of cosmetic products that are applied to the skin, lips, eyes, or brows for the purpose of altering appearance.
- Makeup is one of, if not the most effective tool for women to instantly improve their appearance.
- Men can also use makeup as well, such as using concealer for undereye bags.

What will this do?

- Research has proven that both men and women alike are rated as more attractive when makeup is applied.
- Makeup can hide uneven skin texture or acne, enhance perceived eye length, refine the tip of the nose, and more.

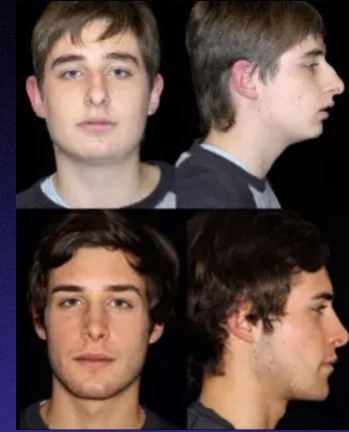

Hardmaxxing

Double Jaw Surgery

Example Results

What specifically?

- A combination of two jaw surgeries, involving a BSSO (lower jaw) and a lefort 1 (upper jaw)
- Create a plan with a maxillofacial surgeon, and agree upon movements that you like.

What will this do?

- Increase submental angularity
- Correct side profile ratios
- Improve Dimorphism

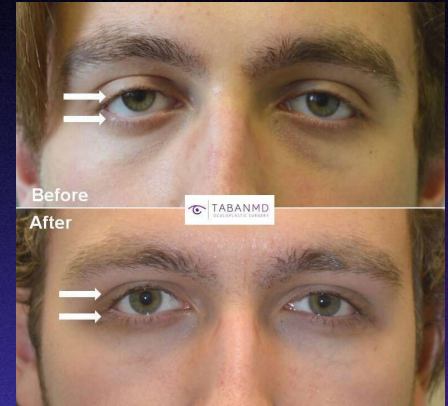

Canthoplasty / Eyelid Retraction Repair

What specifically?

- Lid retraction repair to increase canthal tilt and correct sagging lower eyelid
- A recommended surgeon : Dr Vreck

What will this do?

- Improve eye shape ratio
- Improve features score
- Increase dimorphism

Otoplasty

EAR PINNING SURGERY

Example Results

What specifically?

- Surgical reshaping of ear cartilage to set the ears closer to the head.

What Will This Do?

- Pins the ears closer to the head for a natural, less protruding look.
- Creates a more refined, mature, and aesthetically pleasing appearance.

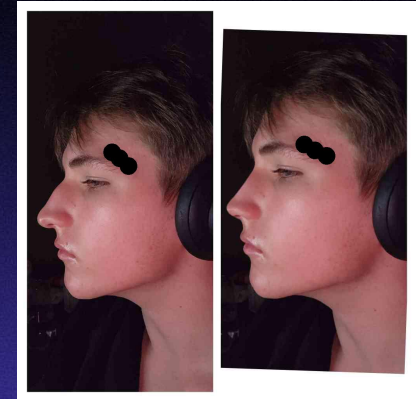

Rhinoplasty

Example Results

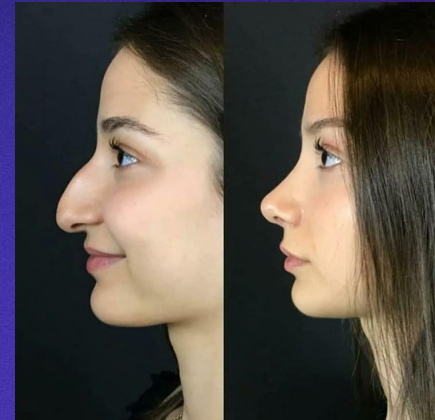

What specifically?

- Rhinoplasty or septorhinoplasty are procedures that alter the appearance of the nose and septum.
- Work with an experienced surgeon who has solid results with noses like yours in the past. Recommended surgeons are Dr. Marianetti, Dr. Steinbacher

What will this do?

- Corrects numerous ratios (facial fifths, nasolabial angle, etc.)
- Improve miscellaneous score by correcting the shape of the nose

Jaw Angle Implants

Example Results

What specifically?

- Jaw angle implants to be placed on the posterior part of the mandible, will connect to ramus
- Widen the gonions

What will this do?

- Increase jaw mass and dimorphism
- Lower gonial angle
- Correct JFA
- Tighten submental region

Genioplasty

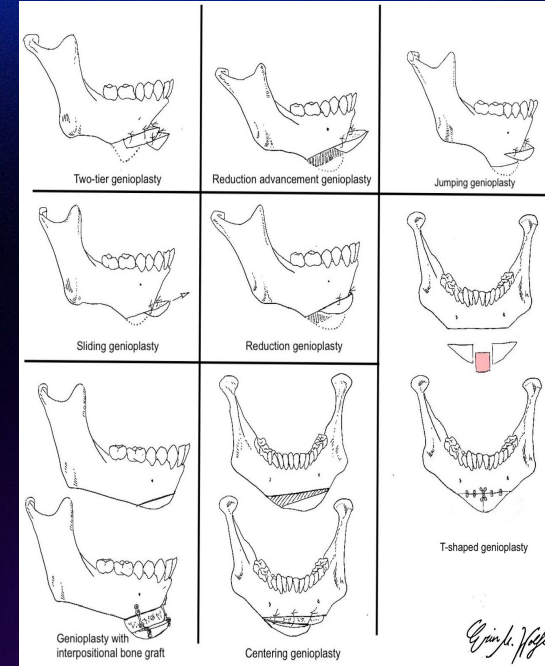

Examples Results

What specifically?

- An osteotomy around the chin where the bone is cut and reshaped to change the chin
- Relatively cheap procedure and typically performed with double-jaw surgery if needed

What will this do?

- Masculinize or feminize the lower third
- Correct lip assessments and convexity
- Can make the face appear taller or shorter
- Correct mentolabial fold and angulation

Jaw Filler

Example Results

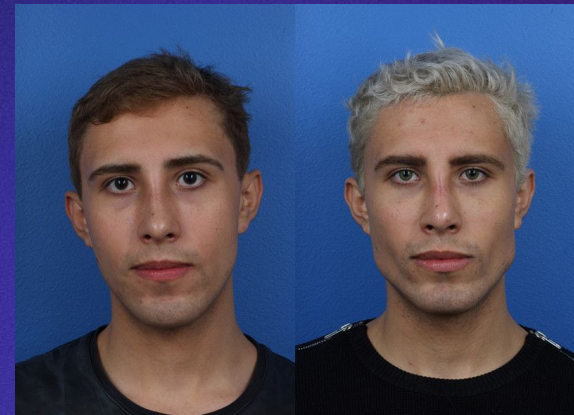

What specifically?

- It is a type of dermal filler you can inject to change the proportions of your face.
- This can be used on weak chins, and narrow mandible bodies as a whole.
- Can be used to change chin shapes as well, from round to square.

What will this do?

- Be used on lower third to boost dimorphism and harmony.
- Help change overall mandible body shape.

Order of Operations

List of surgeries in priority.

1. Double jaw surgery
2. Canthoplasty
3. Eyebrow transplant reshaping
4. Rhinoplasty
5. Genioplasty

What will this do?

- Better features
- Better facial harmony
- Better dimorphism
